

How to clear temporary internet files for <https://winfund.wfgcanada.com> website:

Note: W.Connect site is best viewed with Internet Explorer 11 or lower.

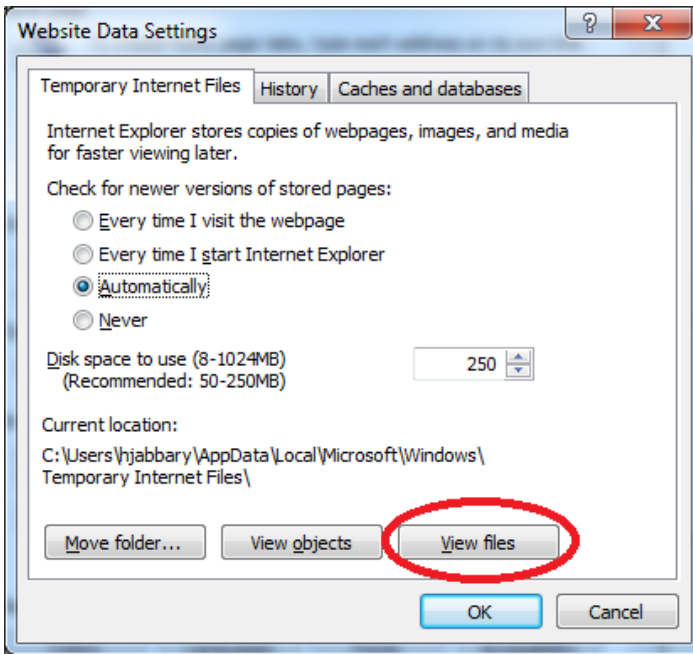

1. Open Internet Explorer
2. From the Tools menu select Internet Options.

3. In the Internet Option window click on the Settings button:

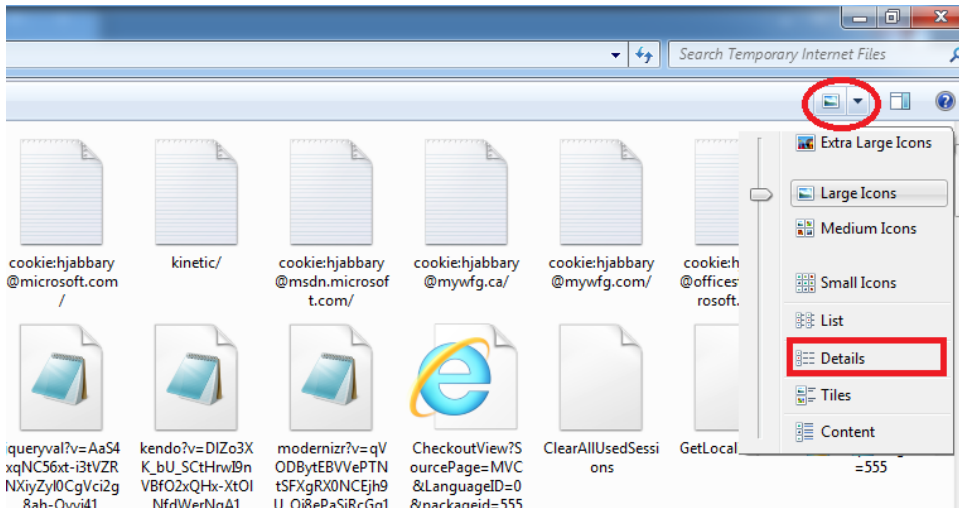

4. Click on View Files button

5. A File Explorer window will open which contains all your temporary internet files.

6. Ensure that files are displayed in Details mode. If they are not click on the small down arrow on the top right corner of your window, and select Details.

You should now see the files in the format below, note the column headings.

7. Click on Internet Address column heading to sort files in an alphabetical order.

The screenshot shows a File Explorer window displaying a list of temporary internet files in Details view. The 'Internet Address' column heading is circled in red.

9. Select and delete all files where the Internet Address is <https://winfund.wfgcanada.com>.

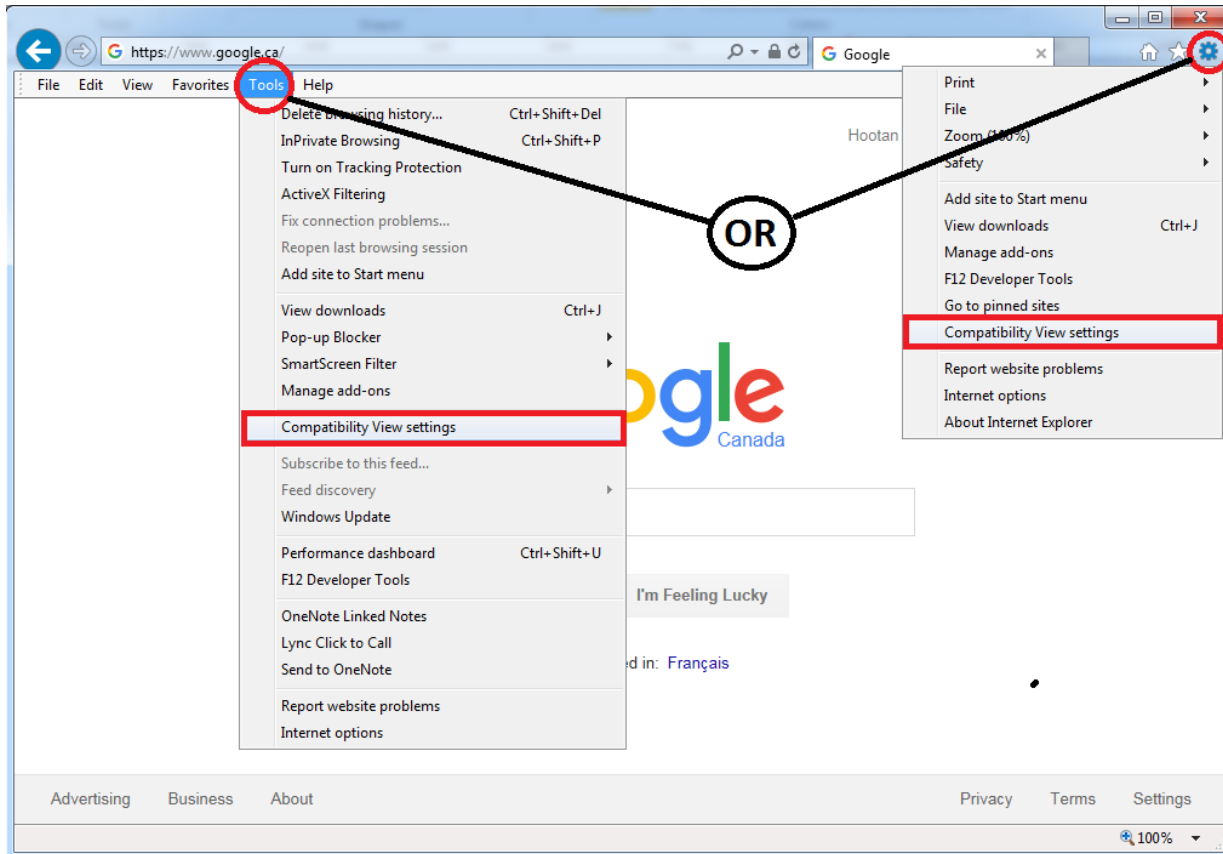

10. Once you're done deleting the files, you can close this window

11. Click Ok to close the Website Data Setting window.

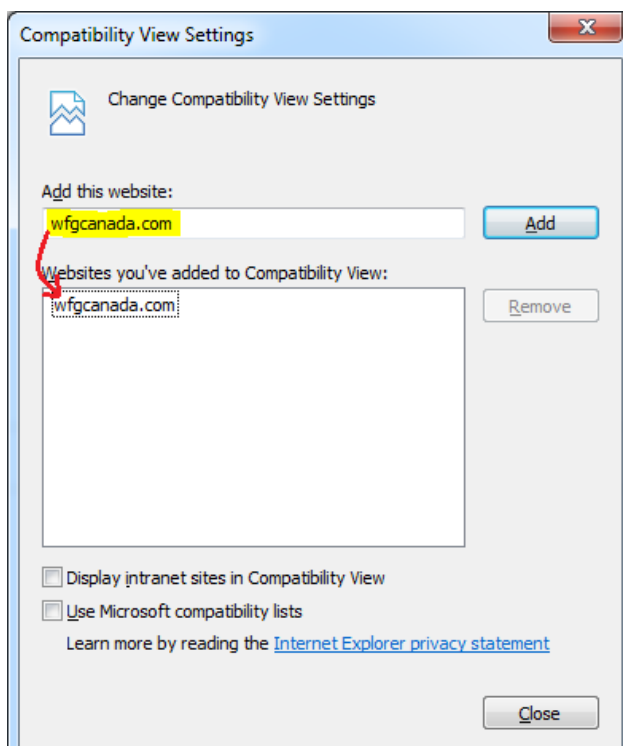

12. Click ok to close Internet option window.

How to add <https://winfund.wfgcanada.com> to Compatibility View.

1. From the Tools menu, select the Compatibility View.

2. Enter wfgcanada.com in the first box and click on Add. You should then see wfgcanada.com move to the box below it. You can then click on the Close button to close the window.

Note: Once all the steps above are complete you can then go to mywfg.com and access the w.connect website. Once you have the W.Connect site open, before doing anything else hold down the <Ctrl> button and press the <F5> button. After the page is refreshed you should now be able to view the site with any issues.
